PROFESSIONAL SUMMARY

Passionate Computer Engineering student mapping a strong foundation in both software development and hardware integrations. Seeking to bridge the gap between hardware and software engineering. Demonstrated experience developing RESTful APIs, building full-stack applications, and designing Android solutions. Proven track record collaborating on backend systems, cloud deployments, and IoT hardware configurations.

TECHNICAL SKILLS

Frontend & Mobile: JavaScript, React Native, HTML5, CSS3

Backend & Cloud: Java, Spring Boot, Python, Node.js, Firebase, PostgreSQL

Hardware & Tools: C++, Arduino, IoT, Linux, Git, Postman, IntelliJ IDEA, DigitalOcean

WORK EXPERIENCE

REVLV Solutions Inc. Jun 2025 – Jul 2025

Backend Developer Intern

- Developed the **ExpenSEEs-API**, a RESTful backend for expense tracking using Java, Spring Boot, and PostgreSQL.
- Implemented core features including user management, budget operations, efficient expense tracking algorithms, and generated structured liquidation reports.
- Integrated JWT-based authentication and Spring Security to enforce deterministic role-based access control.
- Deployed the software onto a DigitalOcean Linux server, establishing CORS for frontend dashboards.

EDUCATION

Ateneo De Naga University Expected Grad: May 2026

Bachelor of Science in Computer Engineering

KEY PROJECTS

- **Expense Tracking System Backend:** Architected a robust backend ecosystem utilizing Spring Boot and Java. Engineered JWT authentication and workflows.
- **University Web Portal:** Designed a Node.js-based student dashboard providing secure portals accessing dynamic schedules, real-time grades, and structured financial statements.
- **BINI Music Streaming App:** Developed a native Android software mapping with Kotlin. Configured background playback handlers and media controls.
- **Real-time Multiplayer Tic-Tac-Toe:** Launched an Android application leveraging the Firebase Realtime Database. Engineered online matchmaking through room-codes.
- **Brick Breaker CpE:** Designed an educational arcade game using React Native where players interact with elements representing computer engineering subjects.
- **Embedded IoT Solutions:** Engineered 10+ integrations of software over hardware using C++/Arduino (Robotic automation, RFID security locks, sensory data).

ACHIEVEMENTS, EVENTS & COMPETITIONS

- **Packethacks 2024 Finalist:** Ideation competition successfully pitching innovative solutions to societal constraints to advance to final bounds.
- **Breadboarding Competition:** Embarked on a 4-year journey from learning electronics basics to actively mentoring juniors in hardware circuits.
- **LAAD Software Festival:** Annual showcase presenting cutting-edge projects and partaking in coding competitions.

AFFILIATIONS & LEADERSHIP

- **Ateneo Computer Engineering Society** — Academic Director (2024-2026)
- **Ateneo Chess Enthusiasts** — Member (2024-2026)
- **ICpEP Student Edition - Bicol** — Member (2022-2026)

CERTIFICATIONS

- Cisco: Data Analytics Essentials
- Cisco: Ethical Hacker
- Cisco: Intro to Cybersecurity
- Cisco: Intro to IoT and Digital Transformation
- Cisco: Junior Cybersecurity Analyst
- Cisco: Network Support and Security
- Cisco: Programming Essentials in C++
- Cisco: Programming Essentials in Python
- NDG: Linux Essentials
- NDG: Linux Unhatched

SEMINARS & FIELD TRIPS

- **Seminar:** Cybersecurity Awareness
- **Seminar:** Web Automation with Playwright
- **Seminar:** CI/CD with GitLab
- **Seminar:** Advanced Cybersecurity
- **Seminar:** Smart Transport Surveys
- **Visit:** Wistron (Tech Manufacturing)
- **Visit:** PLDT & Smart (Telecommunications)
- **Visit:** BRP Hydrographer Presbitero
- **Visit:** Vessel Traffic Management System
- **Visit:** GigaMare (Maritime Tech)
- **Visit:** Law Enforcement Department
